AND POWER OF ATTORNEY**

As a below named inventor, I hereby declare that:

My residence, post office address and citizenship are as stated below adjacent to my name.

I believe I am the original, first and sole inventor (if only one name is listed below) or an original, first and joint inventor (if plural names are listed below) of subject matter (process, machine, manufacture, or composition of matter, or an improvement thereof) which is claimed and for which a patent is sought by way of the application entitled

Nonexposed Heat Sink for Semiconductor Package

which (check) is attached hereto.

and is amended by the Preliminary Amendment attached hereto.

was filed on _____ as Application Serial No.

and was amended on ___ (if applicable).

I hereby state that I have reviewed and understand the contents of the above identified specification, including the claims, as amended by any amendment referred to above.

I acknowledge the duty to disclose information, which is material to patentability as defined in Title 37, Code of Federal Regulations, § 1.56.

I hereby claim foreign priority benefits under Title 35, United States Code, § 119(a)-(d) of any foreign application(s) for patent or inventor's certificate or any PCT international application(s) designating at least one country other than the United States of America listed below and have also identified below any foreign application(s) for patent or inventor's certificate or any PCT international application(s) designating at least one country other than the United States of America filed by me on the same subject matter having a filing date before that of the application(s) of which priority is claimed:

**DECLARATION OF JAMES E. PARSONS IN SUPPORT OF PETITION FOR
RETROACTIVE FOREIGN FILING LICENSE**

I, James E. Parsons, declare as follows.

1. I am a registered U.S. patent attorney (no. 34,691). My office is at Skjerven, Morrill, MacPherson, Franklin & Friel LLP, 25 Metro Drive, Suite 700, San Jose, California, 95110 (phone (408) 453-9200).

2. In early August 1999, I became responsible for preparing an United States patent application for Amkor Technology, Inc. ("Amkor") and Anam Semiconductor Inc. ("Anam"). Amkor is based in Chandler, Arizona. Anam is based in Korea. The subject matter of the disclosure was a nonexposed heat sink for an integrated circuit package. At the time, I understood that the inventors were Christopher de Simone and Lucian Hand of Amkor, and Gi Jeong Kim, Seung Mo Kim, and Jin An Lee of Anam.

2. On August 4, 1999, I inquired with Anam as to whether the subject matter was included in a patent application filed in another country. On or about September 2, 1999, I learned from Anam that the idea of a nonexposed heat sink was included in Korean Patent Application No. 99-13130 along with several other package and leadframe ideas. The Korean patent application was filed on April 14, 1999. I had no involvement with the filing of that Korean application.

3. I received an English language version of the Korean application in late September or early October 1999. I saw that the idea of a nonexposed heat sink was one part of an application that included numerous package and leadframe ideas. I subsequently worked on a draft of a U.S. application based and sent a draft to the inventors on October 8, 1999.

4. Between mid-November and December 9, 1999, after one or both of Messrs. de Simone and Hand had gone through the draft, I confirmed with them that the idea of a nonexposed heat sink was initially conceived in the United States by Mr. de Simone, but was subsequently tested and developed further with Anam engineers in Korea when Mr. de Simone visited Anam's facility.

5. Thereupon, I set about to have a petition for a retroactive filing license prepared.

6. The present petition was timely filed after a reasonable period of investigation of the facts and communications with the persons involved. The amount of time taken was reasonable given that translations had to be obtained of the Korean application and that Anam's patent staff is located in Korea.

7. I further declare that all statements made herein of my own personal knowledge are true and that all statements made on information and belief are believed to be true; and further that these statements were made with knowledge that willful false statements and the like so made are punishable by fine or imprisonment, or both, under Section 1001 of Title 18 of the United States Code, and that such willful false statements may jeopardize the validity of the above referenced application or any patent issuing therefrom.

**DECLARATION OF TaeBok Jung IN SUPPORT OF PETITION FOR
RETROACTIVE FOREIGN FILING LICENSE**

I, TaeBok Jung, declare as follows.

1. I am a citizen and resident of Korea. I am employed by Anam Semiconductor Inc. ("Anam") in Korea.

2. I was responsible for the filing of Korean Patent Application No. 99-13130, which was filed in the Korean Industrial Property Office ("KIPO") on April 14, 1999.

3. When the Korean application was filed, I believed that the inventors of the entire subject matter disclosed therein were Gi Jeong Kim, Seung Mo Kim, and Jin An Lee, and that the subject matter was invented at Anam in Korea. At that time, I did not know that Christopher J. de Simone or Lucian Hand had any involvement with the subject matter disclosed in the Korean application, or that any part of the subject matter was invented in the United States.

4. The subject matter disclosed in the Korean application is not under a United States government secrecy order, and was not under a United States government secrecy order at the time the Korean application was filed with the KIPO on April 14, 1999.

**DECLARATION OF CHRISTOPHER J. DE SIMONE IN SUPPORT OF PETITION
FOR RETROACTIVE FOREIGN FILING LICENSE**

I, Christopher J. de Simone, declare as follows.

1. I am employed by Amkor Technology, Inc. in Chandler, Arizona.
2. I conceived of the idea of a nonexposed heat sink for an integrated circuit package by at least September 1997. I initially conceived of the idea at Amkor's facility in Chandler, Arizona. By the first quarter of 1998, I was working on the idea with engineers at Anam Semiconductor Inc. ("Anam") in Korea. In Korea, I further developed and tested my idea. I also worked with engineers at Anam and developed ways to include it in a molded package.
3. I am informed that my concept of a nonexposed heat sink was included in Korean Patent Application No. 99-13130, which apparently was filed in the Korean Industrial Property Office on April 14, 1999. I was not in any way involved in the filing of the Korean patent application. At the time, I was involved in Amkor's process for initiating a U.S. patent application, but I was not aware that Anam intended to file or had already filed a Korean application. I learned the contents of the Korean application in around November 1999, when I reviewed a draft of a U.S. patent application that was based on the Korean application. It

appears that the Korean application included my concept of a nonexposed heat sink package with a leadframe and other package concepts invented by engineers at Anam.

4. My invention of a nonexposed heat sink is not under a United States government secrecy order, and was not under a United States government secrecy order at the time the Korean application was filed on April 14, 1999.

5. I further declare that all statements made herein of my own personal knowledge are true and that all statements made on information and belief are believed to be true; and further that these statements were made with knowledge that willful false statements and the like so made are punishable by fine or imprisonment, or both, under Section 1001 of Title 18 of the United States Code, and that such willful false statements may jeopardize the validity of the above referenced application or any patent issuing therefrom.
